Latest Version: 6.0

Question: 1

Which two best practices align with incident response and compliance objectives?
(Choose two.)
Response:

A. Maintain immutable logs
B. Use shared admin credentials
C. Implement real-time monitoring
D. Disable auditing to improve performance

Answer: A,C

Question: 2

Which two controls help detect drift in IaC-managed infrastructure?
(Choose two.)
Response:

A. Continuous configuration monitoring
B. Manual change log entries
C. Immutable infrastructure patterns
D. DHCP snooping

Answer: A,C

Question: 3

Which two metrics are important for evaluating the performance of automated security response workflows?
(Choose two.)
Response:

A. Mean Time to Detect (MTTD)
B. CPU temperature
C. Mean Time to Respond (MTTR)
D. VLAN propagation speed

Answer: A,C

Question: 4

Which two solutions help ensure consistent policy enforcement across multi-cloud workloads? (Choose two.)
Response:

A. Cisco Secure Workload (Tetration)
B. SNMP traps
C. Cloud-delivered Firewall (CDFW)
D. Static IP routing

Answer: A,C

Question: 5

Which function does a DLP system perform when protecting application data?
Response:

A. Inspects routing tables
B. Enforces policy compliance by inspecting data in transit
C. Redirects packets to edge firewalls
D. Provides segmentation using VLANs

Answer: B

Question: 6

Which two approaches support secure communication in containerized microservices architectures? (Choose two.)
Response:

A. Mutual TLS between services
B. Shared service account credentials
C. Service Mesh with policy enforcement
D. Static NAT entries

Answer: A,C

Question: 7

When designing security for applications distributed across multiple cloud providers, what is a key consideration?
Response:

A. Consistent identity and access policies
B. High-performance DHCP services
C. MPLS cloud backbone routing
D. Local proxy deployment

Answer: A

Question: 8

How does AI improve the performance of intrusion prevention systems (IPS)?
Response:

A. Decreases SNMP load
B. Enables real-time dynamic rule creation
C. Disables logging overhead
D. Bypasses signature-based detection

Answer: B

Question: 9

What is the primary benefit of conducting a root cause analysis after a security incident?
Response:

A. Validate OSI model compliance
B. Enable compliance with NTP standards
C. Drive design improvements to prevent recurrence
D. Improve FTP throughput

Answer: C

Question: 10

Which Cisco product provides automated incident response workflows integrated with SIEM and SOAR platforms?
Response:

A. Cisco SecureX
B. Cisco AnyConnect
C. Cisco DNA Center
D. Cisco Catalyst

Answer: A
