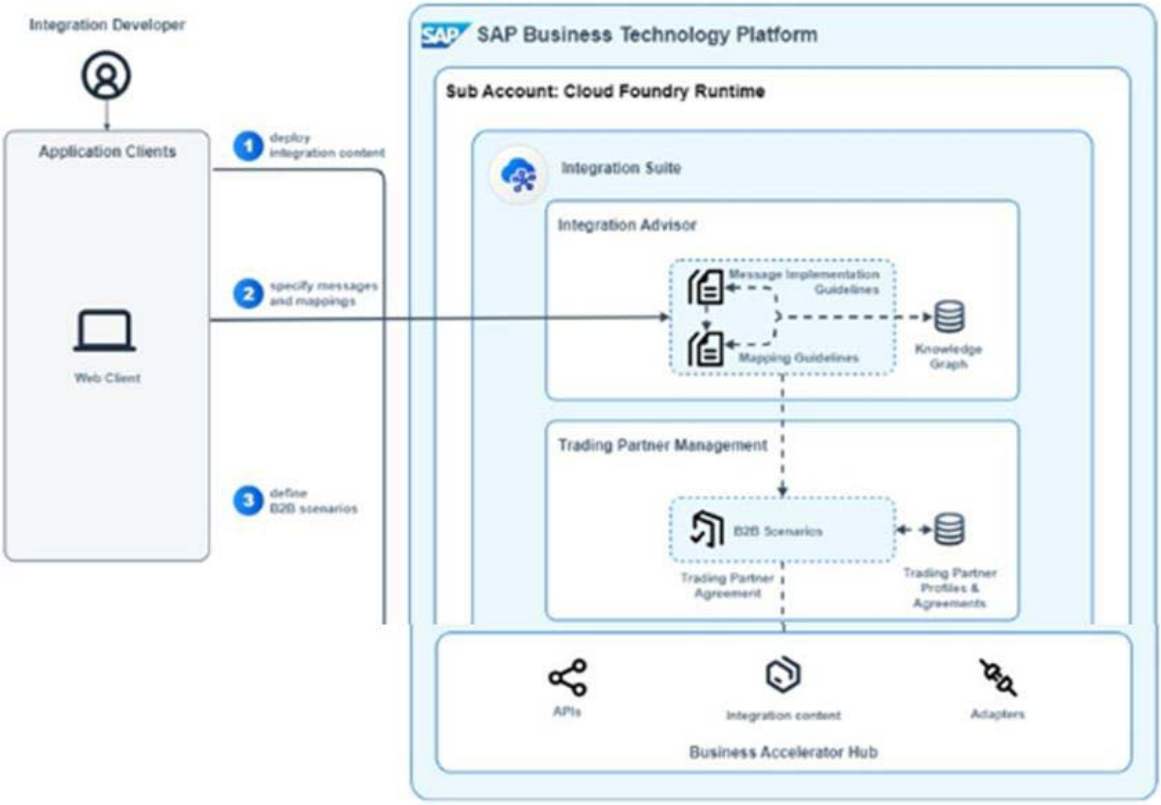
1. SAP Solution Architecture

Topic: 1
SAP Solution Architecture

Question: 1

In which phase of the SAP Integration Solution Advisory Methodology is a technology mapping of customer use cases and SAP BTP integration services produced (for an example of a solution architecture blueprint, see the attached diagram)?



A. Enable a practice of empowerment
B. Define integration best practices
C. Design your hybrid integration platform
D. Assess your integration strategy

Answer: C

SAP Solution Architecture

Question: 2

A company is decommissioning its legacy ERP system in favor of adopting SAP solutions. The company is not sure which specific solutions to adopt. The company has three main business goals:
• Maintain several unique business processes.
• Maintain the solutions with a small budget, and limited time and resources.
• Integrate several non-SAP solutions.
Which combination of solutions should the customer adopt?

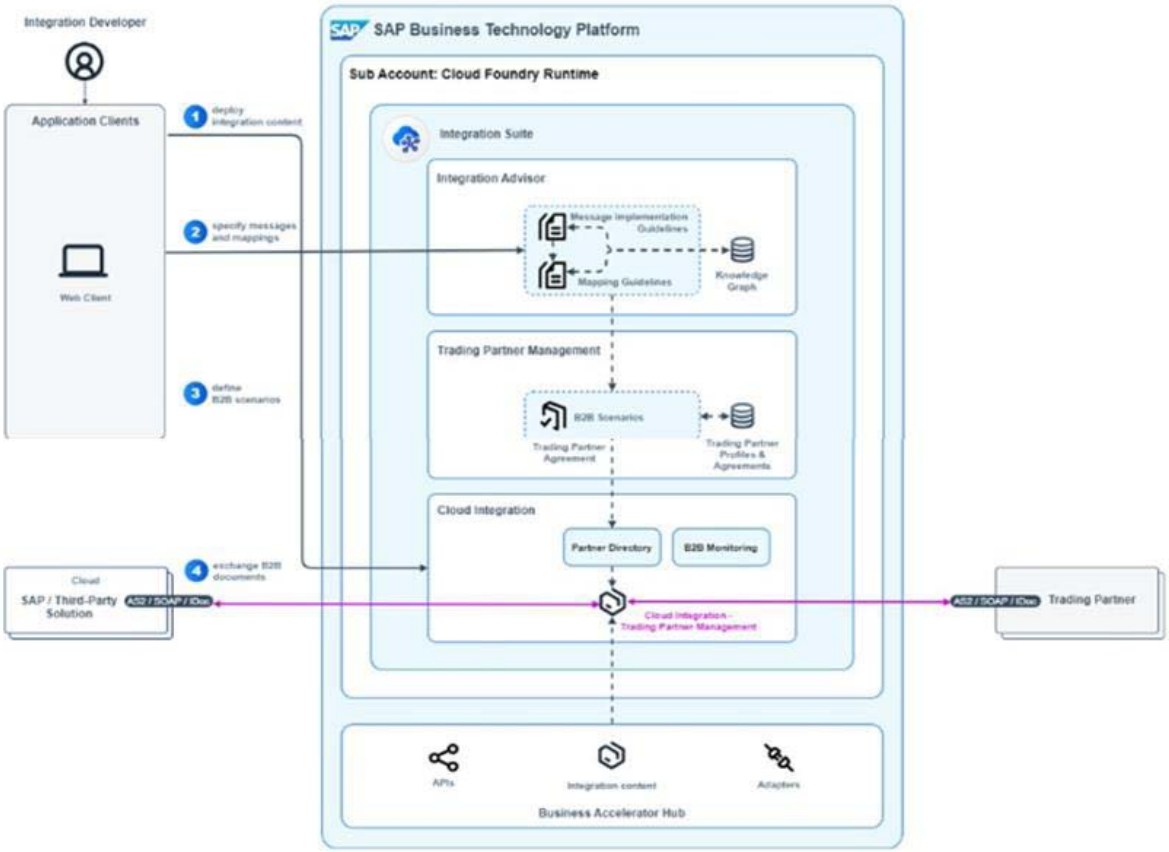
A. SAP Lean IX | SAP S/4HANA on premise | SAP BTP
B. SAP Signavio | SAP S/4HANA public edition | SAP Process Orchestration
C. SAP Signavio | SAP S/4HANA Cloud public edition | SAP BTP
D. SAP Lean IX | SAP S/4HANA Cloud private edition | SAP Process Orchestration

Answer: C

SAP Solution Architecture

Question: 3

A customer wants to verify the feasibility of the attached "proof of concept" design. They would prefer a zero (or minimal) upfront investment but want to seamlessly transition to a different pricing model while preserving their SAP BTP investments if the design works.
As a solution architect, which pricing plan would you recommend to the customer?



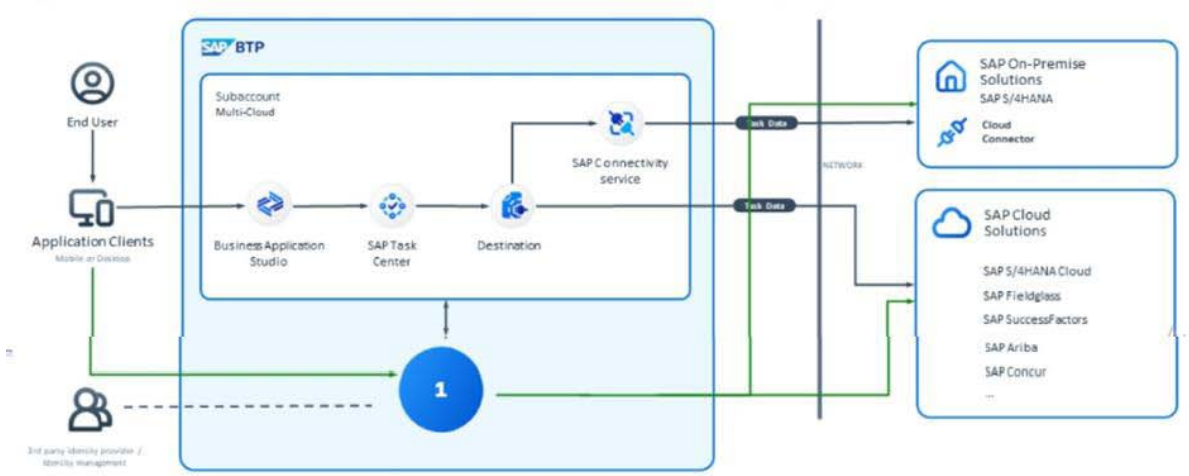
A. Subscription
B. Pay-As-You-Go for SAP BTP
C. SAP BTPEA
D. SAP BTP trial

Answer: B

SAP Solution Architecture

Question: 4

You are a solution architect and your client has recently completed a merger and acquisition. Your client uses SAP S/4HANA Cloud Public Edition and the acquired company is using SAP ECC 6.0. For business and legal reasons, the users of the acquired company cannot yet be added to the global user directory. The acquired users still need access to the custom application.
Given the attached diagram, which solution would you recommend to your client in "1" to enable this access?



A. SAP Cloud Identity Services - Identity Authentication
B. SAP Cloud Identity Services - Identity Provisioning
C. SAP Authorization and Trust Management Service
D. SAP Secure Login Service for SAP GUI

Answer: A

SAP Solution Architecture

Question: 5

As a solution architect, you are asked for your opinion on an optimal integration. You are told that the data resides in two places, SAP S/4HANA (on- premise) and third party APIs. You are also told the following requirements:
• Periodically read the data from both systems, perform several transformations of the data, and forward the results to a business partner.
• Monitoring is to be done by a dedicated group from IT with SAP products.
• Maintenance of the integration part has a small budget, limited time, and limited resources.
Which of the following solutions would you recommend as optimal for the design?

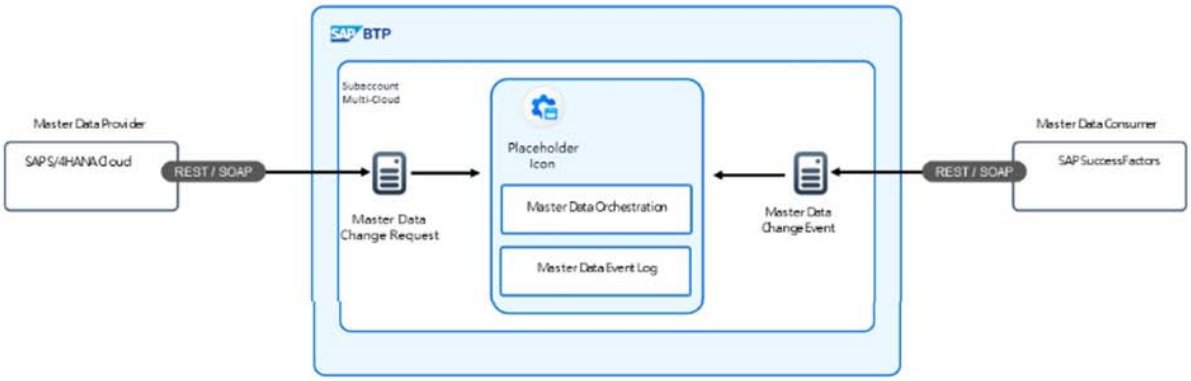
A. A custom SAP Fiori App and Grafana
B. SAP Build Process Automation and SAP Solution Manager
C. SAP Integration Suite and SAP Cloud ALM
D. SAP Build Apps and SAP Cloud ALM

Answer: C

SAP Solution Architecture

Question: 6

The customer is looking to use an SAP BTP service to replicate master data objects across connected business applications. The service should be based off of the process integration style and the integration use case pattern as defined in the SAP Integration Solution Advisory Methodology.
The customer wants to use an SAP BTP service to synchronize the workforce person master data object between SAP S/4HANA Cloud and SAP SuccessFactors HXM Suite as part of the Hire to Retire process (for cloud deployment). They prefer a service that uses a "hub and spoke" model to enable the synchronization.
Which of the following SAP solution should the customer use as the "Placeholder Icon" (see attached diagram)?



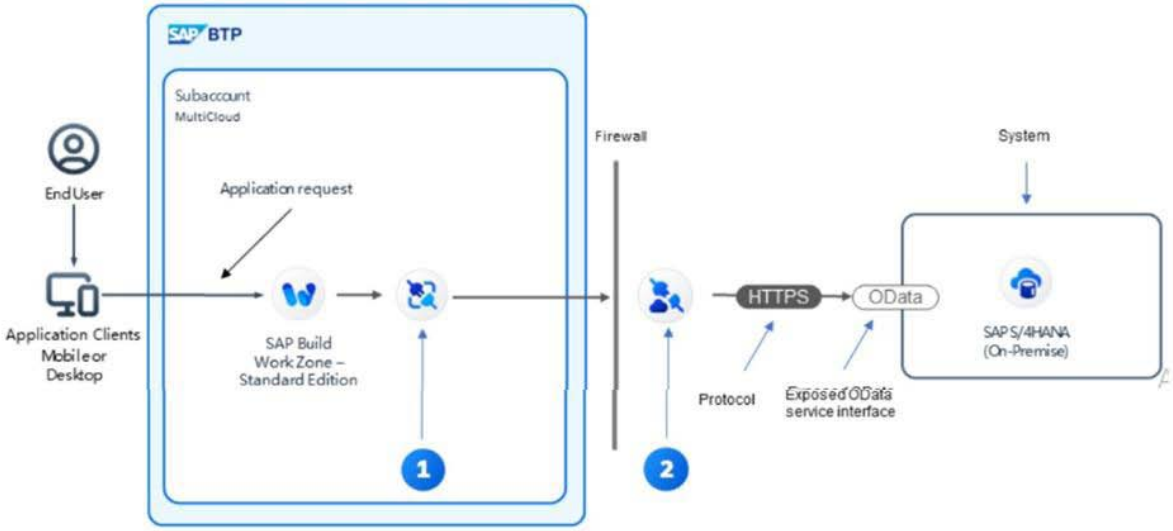
A. SAP Master Data Integration
B. SAP Master Data Governance
C. SAP Cloud Integration
D. SAP NetWeaver Master Data Management

Answer: A

SAP Solution Architecture

Question: 7

A customer wants to establish connectivity between applications being executed by end users and the on-premise backend system (SAP S/4HANA).
Based on the attached diagram, which combination is necessary to establish the connectivity?



A. Cloud Connector for 1 and Destination Service for 2
B. Connectivity Service for 1 and Cloud Connector for 2
C. Custom Connector for 1 and Connectivity Service for 2
D. Destination Service for 1 and Connectivity Service for 2

Answer: B
