Answer: A,C

Question: 7

Which two statements accurately describe how producers interact with partitions in Kafka?
(Choose two)

A. Producers send all messages to partition 0 by default
B. A key ensures messages go to the same partition

C. Producers manually assign offsets
D. Partitioning helps achieve parallelism in message delivery

Answer: B,D

Question: 8

When creating a Kafka topic in Confluent Cloud, what happens if no replication factor is specified?

A. It uses the replication factor of the cluster configuration
B. It depends on the environment
C. It defaults to 1
D. You must manually specify it; otherwise topic creation fails

Answer: A

Question: 9

What is the primary purpose of configuring network access on a Kafka cluster in Confluent Cloud?

A. To optimize message compression settings
B. To enable multiple schema versions
C. To restrict or allow client access via public or private endpoints
D. To limit partition replication

Answer: C

Question: 10

Which ksqlDB construct should be used for building materialized views of the latest value per key?

A. STREAM
B. SCHEMA
C. JOIN
D. TABLE

Answer: D
